

April 4, 2011

**To: Dr. Apostolov,
Editor "PAC World" magazine**

In your magazine (issue March, 2011) I have just found out Walter Schossing's article "Protection History. Frequency Protection" in which he used the text and figures from the chapter 14 "Frequency Relays" of my book: "Electric Relays: Principles and Applications", 2006, CRC Press, USA.

I hope you know that such use of materials without references to the original publication and author named as "**plagiarism**".

Can you explain the publication of such material in your magazine?

Dr. Vladimir Gurevich

Hi Vladimir,

I forwarded the text from your e-mail to Walter Schossig and he confirmed that he has used material from your book. So in the June 2011 issue I will post a notice regarding the use of material from your book in the History article.

Alex Apostolov
