**Subject:** Regarding of Royalty Department office Report at September 16, 2019.

Good afternoon Dr. Gurevich,

Thank you for your patience. I do hope all is well with you.

I have gone over the analysis with Emmett and have attached to this email your requested analysis.

We are tracking data on two works *Digital Protective Relays* and *Electronic Devices*. I believe these open units to be an error in the royalty inquiry performed by the royalty clerk Stephen Kruszewski in September. I do apologize for any errors or confusion.

Please let me know if I can be of any further assistance.

Kind regards,

Christin Harrington  
Royalty Department Manager

## Regarding of Royalty Department office Report at September 16, 2019.

Helo, Mr. Dages and Mrs. Harrington

You wrote: "***I believe these open units to be an error in the royalty inquiry performed by the royalty clerk Stephen Kruszewski in September. I do apologize for any errors or confusion.***" and sent to me another data.

If your Royalty Department sends me some data to my request to explain the significant difference in the number of copies of books sold, and then you say that these data from your Royalty Department is erroneous and sends to me another data, then what data of Royalty Department should I believe? Can be data of your Royalty Department sent me at September 16 is correct and your new data is not correct?

If there were doubts about the correctness of the data of your Royalty Department, then it would be more right to correct the mistake and pay to author who has been cooperating with Taylor & Francis for 15 years, instead of arguing over trifles with him. If I were a representative of Taylor & Francis, I would be for shame to arguing with the author of 6 books published by Taylor & Francis because of 29 copies.

Such behavior clearly demonstrates the actual attitude of Taylor & Francis towards its authors!

Dr. Vladimir Gurevich
